RentSat

Bring your own live video or ip-connection via satellite !

Video production companies, TV stations, news gatherers, streaming companies and event organisers but also companies and organisations with teams on remote locations can benefit from the power of our RentSat systems that provide a temporary broadband connection with easy to set up unit from any location in Europe or worldwide.

RentSat Ka-Terminal

Professional grade equipment with a speciale modem for high reliable connection.

Provides KaSatPro two way broadband internet services via the new high throughput Ka-band satellite over Europe.

The unit is build up the event location by our crew and collected there again after the event.

The two way internet connection provides internet access (wifi hotspot!) on locations without reliable internet e.g. for browsing, e-mail of FTP.

The Rentsat Ka-Terminal also provides a solution for cost effective video connections e.g. from an event location to a streaming video distribution server for live publication on the internet.

Ideal for events or temporary WAN connections for corporate networks.

KaSatPro IP Conneiitons as:

** Occ Use Dedicated Connections
(up to 10 Mbps) voor live video*

** 24/7 Shared Verbindingen
(6 Mbps up / 22 Mbps down)
For internet access or corporate network /
WAN verbindingen.*

RentSat Ku-Terminal

*KuSatPro IP-connections as:
*Occ Use Dedicated Connetions
For live video
* 24/7 Shared Internet Access
services*

Our DriveAway unit provides KuSatPro two way broadband IP connections from every location worldwide: Africa, Middle East, North and Southg America, Asia.

The unit is shipped to the end location and can be mounted on any standard car with roof rack.

As Light Satellite News Gathering system it is ideal for live video connections up to 5 Mbps dedicated uplink speed. (note Encoder/decoder set not included).

Can also be used for temporary internet acces or corporate network connections on a per day per week or per project basis, that can be configured on requirements.

KuSatPro Dedicated service	Satellite Service	KaSat NewsSpotter
  We recieve your signal at the M2sat Teleport in Bremen that is on top of the internet backbone.	Downlink Teleports	 The connection comes in at the Ka-band Teleport in Germany On top of the internet backbone.
IP-services Standard Internet Access *VIDEO-services (optional)* For video contributions we set up a IP-connection to the decoder in your studio.	*Internet/corporate network* *Studio*	*IP-diensten* Standard Internet Access. Per applicatie kan aparte Configuratie nodig zijn. *VIDEO-services (optional)* For video contributions we set up a IP-connection to the decoder in your studio.
Alternatively we can forward teh signal directly to your own streaming server or to the M2sat 360MM streaming server.	*Streaming Server or 360 MM Platform*	Alternatively we can forward teh signal directly to your own streamir server or to the M2sat 360MM streaming server.

RentSat terminals: easy to use

Setting up an IP connection with the RentSat Ku-terminal is extremely simpel: Park your car with the system on top and a clear view to the south. Switch on the power and the antenne will point to the satellite. Call M2sat to set up the IP connection. For video connections to the studio or a streaming server we make separate arrangements.

The Rentsat Ka-Terminal is even more simple:

Our crew comes to the event location and installs the unit on a pole mount, and switches it on.

You work as if you have a normal internet connection. After the event our crew picks up the unit.

RentSat also for you !

➢ Occ Use service in the past were only for Broadcasters and in Mhz, but not any more !

➢ You can now make Live Vide Connections as well as Broadband IP connections (both guaranteed as dedicated) independent of location. M2sat RentSat takes care you always have enough bandwidth at the breaking news or event location, connection you to your studio corporate network, data centre or streaming server.

➢ Rentsat is ideal as **back up** for terrestrial connections.

➢ RentSat is available per day, per week or per project duration. **You only pay when what you use!**

➢ The RentSat Uplink systeem is **easy to use by your team.** The Rentsat Ku-terminal has and een auto pointing antenna and the unit is remote controled by the M2sat support desk. De RentSat Ka Terminal is set up on location by our crew and constantly monitored. We also provide a short training to teach you and y our crew how to set up and operate the unit.

➢ Costs for reliable internet connections or Live Video contribution from events or breaking news sites have never been this low. Operation costs of M2sat Rentsat systems are half that of traditionele satelliet solutions. Benifit from this with your next production.
