

## 1,8 mtr Fixed Antenna Pack For KuSatPro Guaranteed service

### KuSatPro Guaranteed 1,8 mtr antenna package

Designed to provide KuSatPro Guaranteed Service under harsh conditions (like in Africa) the 1,8 mtr fixed antenna pack is a perfect and reliable equipment package for pro-grade internet services. The package includes the following components:

Fixed Antenna Pack	
<p>1,8 m Type 123 Class II TxRx Antenna with Ku-band Feed Assembly (2-port, linear, cross-polar) Intelsat/Eutelsat Type Approval</p> <p>6 Watt BUC standard Ku-Band PLL universal LNB low or high Ku-band iDirect X3 Satellite Modem &amp; integrated IP Router 75 m IF cable with connectors and Surge Protection/Grounding Kit</p>	

- **Antenna size** : Included in this pack a 1,8 mtr antenna that is typically used in locations as in Africa to get some extra gain for a more stable connection. Optionally we can provide 1,2 mtr or 2,4 mtr antennas.
- **BUC** : The included 6W BUC is again to optimize the link in locations like in Africa. Contact us for 4W BUC options.
- **Modem type**: Included in the KuSatPro Guaranteed Services pack is a X-3 iDirect modem. We have also other iDirect modems available. Our KuSatPro Dedicated service uses SCPC Comtech modem. Contact us for more information and pricing.
- **Configuration and Installation** : All modems will be pre-configured at our NOC before they are send to you to allow easy installation.

### Retail pricing

Package price per pack is Euro 3250 ex VAT and taxes. Transportation is not included in this price and depends on the delivery address, time and way of transportation (sea freight vs. air freight).

### Specific Pricing proposals

The pricing in this leaflet is for budgetary purposes only and can be changed by M2sat at any time without guarantees. For specific pricing for a or a customer requirement or specific KuSatPro VSAT project please contact
